About this Series

Geomechanics deals with the application of the principle of mechanics to geomaterials including experimental, analytical and numerical investigations into the mechanical, physical, hydraulic and thermal properties of geomaterials as multiphase media. Geoengineering covers a wide range of engineering disciplines related to geomaterials from traditional to emerging areas.

The objective of the book series is to publish monographs, handbooks, workshop proceedings and textbooks. The book series is intended to cover both the state-of-the-art and the recent developments in geomechanics and geoengineering. Besides researchers, the series provides valuable references for engineering practitioners and graduate students.

Preface

Interests in localization and related instabilities in the field of geomechanics date back to the JMPS paper of Rudnicki and Rice (1975) “Conditions for the localization of deformation in pressure-sensitive dilatant materials”. It models strain localization in rocks as material instability. Subsequently, strain localization in soils was considered as shear band by Vardoulakis et al. (1978) “Formation of shear bands in sand bodies as a bifurcation problem” in IJNAMG. Research interests in this area expanded considerably and resulted in the first international workshop on Localization of Soils organized in Karlsruhe, Germany, February 1988, and this international workshop became the first sequel to our current International Workshop on Bifurcation and Degradation in Geomaterials (IWBDG). This aroused so much enthusiasm and interest in the fundamental aspects of bifurcation theory to soils that the second workshop followed in Gdansk, Poland, September 1989. The topic was then extended to rock mechanics at the third international workshop in Aussois, France, September, 1993. In 1997, this international workshop series was expanded to include instabilities and degradations in geomaterials at the fourth workshop in Gifu, Japan, September 1997. Since then, the name of IWBDG was adopted and subsequent international workshops were held at Perth, Australia, November 1999 (fifth), at Minneapolis, USA, June 2002 (sixth), at Crete, Greece, June 2005 (seventh), at Lake Louise, Canada, May 2008 (eighth) and at Porquerolles, France, May 2011 (ninth). The tenth international workshop of this series continued this central theme of bifurcation and degradation of geomaterials, and was held in Hong Kong during May 28–30, 2014 (10th IWBDG) at the beautiful campus of the Hong Kong Polytechnic University.

The 10th IWBDG was attended by 66 participants representing 16 countries or regions, including Australia, Austria, Belgium, Canada, Chile, France, Greece, Hong Kong China, Iran, Japan, Mainland China, Norway, Poland, Sweden, UK and USA. A total of 55 presentations were delivered, covering three full days. Among them, 17 were registered as students. This proceedings published by Springer contains 54 peer reviewed full papers.

The workshop would not be possible without the help of qualified and diligent reviewers, and they include Mustafa Alsaleh, Ronaldo I. Borja, Jacques Desrues,

Zhiwei Gao, Ning Guo, Peijun Guo, Marte Gutierrez, Wenxiong Huang, Mingjing Jiang, Xia Li, Francois Nicot, Fusao Oka, Jacek Tejchman, Antoinette Tordesillas, Richard Wan, Gang Wang, Jeff Jianfeng Wang, Wei Wu, Zhenyu Yin, Jidong Zhao (in alphabetical order). Their helps are highly appreciated. The financial sponsors are Fong On Construction Limited (courtesy of Dr. James C.K. Lau, JP) and the Faculty of Construction and Environment, The Hong Kong Polytechnic University (through Conference Support Scheme). Non-financial sponsors include Geomechanics Committee, AMD of ASME, Elasticity Committee, EMI of ASCE, HKGES, Geotechnical Division of HKIE and TC103 Numerical Methods of ISSMGE. The clerical and logistics supports from the Department of Civil and Environmental Engineering are highly appreciated.

Contents

Simulations of Shear Zones and Cracks in Engineering Materials Using eXtended Finite Element Method	1
Jerzy Bobiński and Jacek Tejchman	
Discrete Modelling of Micro-structural Phenomena in Granular Shear Zones	7
Michal Nitka, Jacek Tejchman and Jan Kozicki	
Modelling Hydromechanical Dilation Geomaterial—Cavitation and Localization	13
Y. Sieffert, O. Buzzi, F. Collin and R. Chambon	
Fabric Evolution and Its Effect on Strain Localization in Sand.	21
Zhiwei Gao and Jidong Zhao	
Micro-mechanical Observations of Strain Localization in Granular Soils During Simple Shear Loading	27
Marte Gutierrez and Abdalsalam Muftah	
Grainsize Evolution in Open Systems.	33
Benjy Marks and Itai Einav	
Numerical Modeling of Failure Process in Cohesive Geomaterials	39
C. Yao, Q.H. Jiang and J.F. Shao	
Hydromechanical Modelling of an Initial Boundary Value Problem: Studies of Non-uniqueness with a Second Gradient Continuum	47
F. Marinelli, Y. Sieffert and R. Chambon	
A FE² Model for Hydro-mechanical Coupling	53
B. van den Eijnden, F. Collin, P. Bésuelle and R. Chambon	

Numerical Simulation and Length Scale Calibration of Micropolar Hypoplastic Model	61
Jia Lin and Wei Wu	
Micromechanical Analysis of Second Order Work in Granular Media . . .	67
F. Nicot, N. Hadda, F. Bourrier, L. Sibille, A. Tordesillas and F. Darve	
Stability and Bifurcation in Reinforced Boreholes	75
Euripides Papamichos	
Shear Banding in Torsion Shear Tests on Cross-Anisotropic Deposits of Fine Nevada Sand	83
Poul V. Lade, Eugene J. Van Dyck and Nina M. Rodriguez	
Effects of Flooding on Crushable Sand	91
Carlos Ovalle, Christophe Dano, Pierre-Yves Hicher and Mónica Cisternas	
Numerical Analysis of 1D Seepage Failure Process of Sandy Materials by CWENO Method	99
Kosuke Tsujimura, Kazunori Fujisawa and Akira Murakami	
Mechanisms of Deformation in Porous Rocks at the Grain Scale	107
Martin Tjioe and Ronaldo I. Borja	
The Influence of Fines Content on the Onset of Instability and Critical State Line of Silty Sand	113
T.-K. Nguyen, N. Benahmed, P.-Y. Hicher and M. Nicolas	
A Multiscale Investigation of Strain Localization in Cohesionless Sand	121
Ning Guo and Jidong Zhao	
The Effect of Rotational Degrees of Freedom on the Formation of Deformation Patterns in Granular Materials Using Digital Image Correlation	127
Maxim Esin, Arcady V. Dyskin and Elena Pasternak	
Stick-Slip Motion and the Associated Frictional Instability Caused by Vertical Oscillations	135
Iuliia Karachevtseva, Arcady V. Dyskin and Elena Pasternak	
Investigation of Direct Shear Interface Test Using Micro-polar Continuum Approach	143
B. Ebrahimian and E. Bauer	

Energy Criterion of In-plane Fracture Propagation in Geomaterials with Rotating Particles 149
 Arcady Dyskin and Elena Pasternak

Dynamic Instability in Geomaterials Associated with the Presence of Negative Stiffness Elements 155
 Elena Pasternak and Arcady Dyskin

Numerical Modeling of Particle Breaking Process in Granular Materials: Compaction and Evolution of Size Distribution 161
 Duc-Hanh Nguyen, Emilien Azéma, Farhang Radjai and Philippe Sornay

Onset of Strain Localization in Unsaturated Soils Subjected to Constant Water Content Loading 169
 Dunja Perić, Gaofeng Zhao and Nasser Khalili

Double-Scale Assessment of Micro-mechanics Based Constitutive Models for Granular Materials Undergoing Mechanical Degradation 175
 Alessandro Tengattini, Edward Andò, Giang D. Nguyen, Gioacchino Viggiani and Itai Einav

Hypoplastic Constitutive Modelling of Grain Damage Under Plane Shearing 181
 Erich Bauer, Linke Li and Wenxiong Huang

Hierarchy of Failure Indicators in the Failure Analysis of Geomaterials 189
 Richard Wan and Xu Gong

Static Liquefaction of Granular Soils: The Role of Grain Shape and Size 199
 J. Yang and L.M. Wei

Static Liquefaction and Instability in Granular Media Subjected to Monotonic Loading—A Micromechanical Investigation 207
 J.C. Lopera Perez, C.Y. Kwok, C. O’Sullivan, K.J. Hanley and X. Huang

Capillary Effect on Critical Length of Force Chains in Partially Saturated Granular Materials Within the Pendular Regime 213
 Peijun Guo

Study on the Initiation of Strain Localization in Soils by 3D Non-coaxial Plasticity 221
 Xilin Lu, Jianju Qian and Maosong Huang

Micromechanics-Based Constitutive Modeling and DEM Simulation of Localized Failure in Soil.	229
Xiaoqiang Gu, Maosong Huang and Jiangu Qian	
Thermally Induced Deformation and Failure in Shale Under Drained and Undrained Heating.	237
